

St. Croix County Public Health just published updated information about COVID-19 vaccine distribution on the county's website. Please share the link to this information. The new [COVID-19 Vaccine webpage](#) includes information about:

- An approximation of when residents can get a COVID-19 vaccine
- What to do after you have been vaccinated
- Where to find more information about the COVID-19 vaccines

St. Croix County is committed to providing vaccinations to our community members as quickly and efficiently as possible, in coordination with the state of Wisconsin and our community partners. The vaccine distribution process is complex and evolving. This will be a long process and St. Croix County Public Health is asking for everyone's patience. We will be adding more information on the St. Croix County website when it is available. You can access the page from the link above or from the [St. Croix County COVID-19 webpage](#).
