

INFORMATIONAL MEETING

TOWN OF BALDWIN

MARCH 5, 2026

6:30-7:00 PM

TOWN HALL, 2399-90TH Ave., Baldwin

Solar Energy Projects have become more common in our area with a large solar energy farm being proposed in neighboring towns.

For one year the Town Board and Planning Commission have met to draft a Solar Energy Systems (SES) Permitting Ordinance in an effort to control solar panel installations, small and large, so they meet the communities' goals of a safe and clean environment.

After these meetings and workshops, a draft was presented to the board in January 2026. This draft was forwarded to the town attorney for comments and recommendations. At the February board meeting a joint board and commission meeting was called for to hammer out any last-minute concerns and incorporated those recommendations into a final *draft* SES Permitting Ordinance.

Since this is a complex ordinance, and could affect every resident, the Town of Baldwin Board of Supervisors wishes to invite the citizens of our town to come to this informational meeting to see and hear about what the current *draft* SES Permitting Ordinance contains and what issues it can and cannot address.
